NHTI, Concord's Community College

Biology Student Outcomes

Upon successful completion of the Associate in Science degree with a major in Biology, students will:

- Analyze theoretical principles across a broad range of sub-disciplines in biological sciences
- Evaluate information scientifically
- Examine the importance of the scientific process
- Perform and effectively communicate the results of scientific investigations
- Review and practice a wide variety of laboratory techniques in microbiology, biochemistry, cell biology, ecology, genetics, and chemistry
- Qualify for transfer to a four-year college or university with the necessary foundation in biology for upper-level study in a wide variety of biological disciplines
