Do you love working with kids? The Early Childhood Education program prepares you to be an active researcher of children and how they learn. You'll learn how to support families as a child's first educator and be the industry's backbone of growth. You'll work with highly trained early childhood teachers, which is essential to your success. Our program teaches leadership development, civic engagement with children and families, and professional training through participation in our Student Early Childhood Association. Classes are taught by expert instructors that are current in the profession.

## Academic Options

Our Child and Family Studies department offers stackable certificates in Early Childhood Education; each enables you to enter the field in as few as 3 courses and gives you the opportunity to build on your knowledge and skills while building credits toward your associate degree. In your practicum, you'll be placed in our community centers and schools. Many practicum experiences lead to full-time employment, and early childhood administrators often seek to have our students placed at their sites. There is financial assistance available through T.E.A.C.H. scholarship opportunities to help offset costs.

## Career Opportunities

Early childhood educators are in demand, and jobs are available as early primary classroom aides, infant and toddler caregivers, early intervention assistants, child development specialists, and children's center directors or administrators. Ample opportunities exist and salaries are on the rise.

## Accreditation

"Accreditation recognizes excellence in early childhood professional preparation at a critical time when public demand for highly qualified early childhood professionals with specialized degrees and credentials is increasing."

## Early Childhood Education Associate of Science Curriculum

	Course	Title	CL	LAB	CR
FIRST YEAR – ON CAMPUS	<b>Fall Semester</b>				
	ECE 101C	Growth and Development of the Young Child <sup>1,2</sup>	3	0	3
