Welcome to ARET! This program combines architecture and engineering theory with applied hands-on activities. You'll study architectural design and engineering processes and develop design, sketching, engineering, and computer-aided design and visualization skills. You'll learn from dedicated and experienced faculty and acquire knowledge about industry practices and culture through our unique guest speaker program.

Solid Foundation for Success

The program combines architecture and engineering theory with a solid foundation in math and science to prepare you for exciting and rewarding jobs. The ARET program maintains an active patronship with professionals from the industry who visit classrooms and labs throughout a semester to review your work, offer feedback, and assess presentations. With a focus on continuous improvement, our ARET program maintains currency and constantly folds emerging technological and professional trends in our curricula to ensure you're prepared for academic and career success.

Enhanced Academic Pathways

Combining your degree with NHTI's Building Inspector and Plans Examiner Certificate can boost your understanding of how buildings are designed, engineered, built, and inspected. Similarly, NHTI's CAD Certificate enables you to develop marketable skills and accumulate 6 credits towards your ARET degree.

Salary Potential

Through networking opportunities with your instructors, visiting professionals, and capstone activities, our graduates find entry-level positions such as CAD and Arch designers, lab and surveying technicians, estimators, and engineering technicians in city and state governments. Graduates can be expected to make \$22.88 entry level and \$34.88 with experience.¹
